# A6. Stock management (Gold)

Recording, pricing and nightly price monitoring of your own stock.

- Stock list and adding a vehicle
- Vehicle data sheet and uploading the vehicle registration certificate
- Pricing and nightly price monitoring
- Sale and removal

# Stock list and adding a vehicle

## Purpose

Managing your own stock, pricing, listing tracking and nightly monitoring in one place.

## Stock list and filters

Statuses include, for example: all, in stock, listed, draft, sold, archived.

Typical summaries:

- active stock items
- quota included in the package
- exceeded quota alert
- planned stock value

During the trial, the quota is 20 stock cars for the entire 14 days.

## Adding a vehicle: process

1. Checking the VIN and identification
2. Narrowing down the results, technical confirmation
3. Stocking data: number plate, mileage, technical validity, purchase price, target and selling price, method of adding to stock, comment
4. Saving as a draft or to stock

## Other upload methods

- Manual entry

- Downloading and uploading a spreadsheet template
- Stock import using the export file of a listing portal (you can provide the export link in the Settings)

*Support: Telegram and Viber, every day of the week between 0 and 24 hours.*

# Vehicle data sheet and uploading the vehicle registration certificate

## Vehicle data sheet

- Editing technical and business data.
- Images and equipment.
- Uploading the vehicle registration certificate: the system provides an automatic data recommendation, reads the relevant fields, and you review and apply them. The system can skip incorrect or uncertain fields without the entire saving process failing.
- Recording advertising platforms (domestic and international listing portals, social marketplace, own website, other), with status (active, paused, closed) and link.

*Support: Telegram and Viber, every day of the week, 24 hours a day.*

# Pricing and nightly price monitoring

## Pricing in stock

- You can review the valuation and pricing on the data sheet.
- After the nightly run, the system indicates if the target price deviates from the fresh market picture by more than the set threshold.
- You can accept the suggested price or keep the current one without having to start a new paid manual valuation.

## Nightly price monitoring (linked to Settings)

- Threshold (for example a deviation of 50, 100, 150 or 200 thousand Ft)
- Frequency: daily, weekly, biweekly or monthly

The frequency controls the rhythm at which the system revaluates and notifies you, and the rhythm of usage billing is also linked to this.

## Sales chance in stock (2026-10-20)

- A sales chance is displayed for every car in the stock. The valuation is prepared using a proprietary method based on market data, with a clear explanation.
- Every valuation is advisory in nature: **Recommendation, not mandatory.**
- The nightly update refreshes the valuations for the stock of every active dealer daily at 04:05 (Budapest time).
- Factory recall: the system also checks the cars in the stock in batches, and the affected cars receive a badge.

*Support: Telegram and Viber, every day of the week between 0 and 24 hours.*

# Sale and removal

## Sale

Record the date of sale and the sale price.

## Removal from stock

With a reason, for example: the owner took it back, it was transferred to another dealer, other.

*Support: Telegram and Viber, 24 hours a day, every day of the week.*
