Site, own cost reserves, marketplace service providers

Site and distance

Providing the site helps in finding nearby service providers. If the site is known, CarVinsight shows the service providers along with the distance.

Permanent and registered partners

Permanent partners can be used in the calculator. You can select the appropriate service provider from the registered partners, and the selection also appears in the calculation.

If there is no selected permanent or registered partner, the previous default transport options remain available. After the calculation, you can switch to another registered service provider and recalculate the amount.

Availability at the time of selection

In the service provider catalogue, for permanent partners and on the service provider data sheet, the weekly opening hours and the next bookable appointments of the service provider are displayed. This way, availability is also visible alongside the price when making a selection.

Register of vehicle orders

Service provider orders initiated for vehicles in stock can be tracked in a register: you can filter by vehicle, search, view the details, and update the status, the cost, the appointment and the

comment. The order path of the given vehicle can be opened from the stock with a single click.

Public recommendation

The public recommendation page of the service providers: partners.carvinsight.eu/ajanlas. Verified service providers with a site and services can share this from the Dashboard.

The acceptance of the full assignment and the separate assignment PDF are still under development. The summary appearing in the order list (if available) does not replace the stamped assignment process.

Support: Telegram and Viber, every day of the week, 24 hours a day.

Official fees, nightly price monitoring, stock import

Official fees

Informational display only, the official tariffs cannot be edited from here.

Nightly price monitoring of stock

- Warning threshold (Forint bands)
- Frequency of notification and revaluation (daily, weekly, every two weeks, monthly)

Stock import

To start the stock import, enter the export link of the listing portal.

In the dealer Settings, there is currently no separate team or user management, two-factor authentication, or language switcher.

Support: Telegram and Viber, 24 hours a day, every day of the week.
