Vehicle data sheet and uploading the vehicle registration certificate

Vehicle data sheet

- Editing technical and business data.
- Images and equipment.
- Uploading the vehicle registration certificate: the system provides an automatic data recommendation, reads the relevant fields, and you review and apply them. The system can skip incorrect or uncertain fields without the entire saving process failing.
- Recording advertising platforms (domestic and international listing portals, social marketplace, own website, other), with status (active, paused, closed) and link.

Support: Telegram and Viber, every day of the week, 24 hours a day.
