Verification

After registration, the service provider goes through an identity and company verification step. At the end of the process, you are redirected to the service provider interface, where a "verification complete" notification awaits you.

Statuses explained simply

- **In progress or pending:** the service provider does not yet appear on the dealer marketplace.
- **Approved:** active, can be listed.
- **Rejected:** inactive.

After approval, the service provider is also registered as a partner and supplier, so subsequent supply negotiations can take place directly, outside the application.

Support: Telegram and Viber, 24 hours a day, every day of the week.
