Services and apps

Status: 20 November 2026. On this page we only describe live services and features.

Overview

Service	For whom	Where it is available
Dealer web interface	Used-car dealers	In a browser: app.carvinsight.eu
CarVinsight app for Android	Used-car dealers	Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.dealer
Service provider interface (marketplace)	Businesses offering transport, service, cosmetics, technical inspection or other services	In a browser: partners.carvinsight.eu
PriceOfMyAuto (Autóérték in Hungary) web valuation	Private individuals	www.carvinsight.eu/en/car-valuation/
PriceOfMyAuto app for Android	Private individuals	Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.priceofmyauto
Knowledge base	Everyone	wiki.carvinsight.eu

For dealers

Dealer web interface (app.carvinsight.eu)

The complete interface of the dealer service. It can be used from a browser from anywhere without installation. Registration, package selection, payment and billing also take place here.

- **Search:** you can search the European supply with filters or free text, even based on a photo. Data sheet with the photos and data of the advertisement, import calculator with the registration tax, the technical fee and the official fees.
- **Saved vehicles:** a temporary parking space for offers not yet in stock. For dealers in Hungary, a customer offer PDF can also be issued.

- **Valuation:** Quick valuation, Stock valuation (Gold), Trade-in, opening a previous valuation by code, printing and PDF.
- **Stock management (Gold):** stock list, adding a car, uploading the vehicle registration certificate, pricing and nightly price monitoring, sale and removal, stock import.
- **Market signals and warnings:** the market signals of the CV agent, Sales chance per car ("Recommendation, not mandatory") and factory recall warning in the Search, in the Valuation and in the stock.
- **Settings:** site, own cost reserves, marketplace service providers, official fees, nightly threshold, stock import.
- **Profile and support:** account details, subscription (Bronze, Silver, Gold), billing address, as well as creating and tracking a Support request.

New dealers get a 14-day trial without a bank card. Details: Registration and activation, Packages: Bronze, Silver, Gold, Overview of menu items.

CarVinsight app for Android

The purchasing, valuation and inventory app for used-car dealers. Available in the Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.dealer

- **Search:** you can search the monitored European supply with filters or free text. You can also identify the car from a photograph and start a search from a photo of the vehicle registration certificate or the technical data sheet, or from their PDF or image file. Both dealer and private individual advertisements can be displayed among the results.
- **Advertisement details:** photos and main data, the cost calculation of the import based on the saved settings. If data is available, a market signal, sales chance and recall warning are also visible.
- **Valuation and Trade-in:** market valuation, recording the Trade-in and the dealer margin, retrieving previous valuations with a code. A PDF can be created and shared of the calculation and the Valuation.
- **Saved vehicles:** saving the selected advertisements, monitoring whether they are still available and contacting the seller.
- **Stock management:** active stock, pricing warnings and drafts to be completed. A stock draft can be started from an advertisement or based on the VIN. Price history, photo upload, recording the sale or archiving per car. There is no bulk stock upload in the app, this is available on the web interface.
- **Settings and notifications:** recording costs and delivery method, phone notification, requesting the deletion of the account.

You can log in with your existing CarVinsight account, or you can also register as a dealer in the app with a 14-day trial period. If your account has a service provider role, the service provider interface opens with the same login. Billing and package management take place on the web interface, there are no purchases in the app.

For service providers

Service provider interface (partners.carvinsight.eu)

For businesses offering transport, service, cosmetics, technical inspection or other services that would like to appear on the CarVinsight marketplace. The service provider role does not include a dealer subscription.

- Dashboard with the status of the Profile and the verification.
- Orders, Services, Opening hours and Calendar (if available in the account), Settings and Support.
- Dealers see nearby service providers based on their site, and they can also calculate with your services in the calculator.

Details: Who is the marketplace for?, Login and the Dashboard.

For private individuals: PriceOfMyAuto

Valuation built on market data in PDF format for your own car or a selected car. The valuation is for informational purposes: it is not an official expert opinion, not an on-site condition assessment and not a purchase offer.

Web valuation

www.carvinsight.eu/en/car-valuation/: 1 490 Ft one-off fee, with a bank card, without registration.

Details: PriceOfMyAuto: car valuation for private individuals (price, order).

PriceOfMyAuto app for Android (version 1.2.0)

PriceOfMyAuto (Autóérték in Hungary) is an app for private individuals. It prepares a valuation built on market data, in PDF format, for your own car or a selected car. The valuation is for informational purposes: it is not an official expert opinion, not an on-site condition assessment and not a purchase offer.

Available in the Play Store:
https://play.google.com/store/apps/details?id=eu.carvinsight.priceofmyauto

Home screen

On the home screen you see the aggregated trend of the Hungarian used-car market, also as a guest. Your saved cars appear below it. In the Market change section we show the movement of the model market of your saved cars, if data is available. This is not a new valuation and not the official value of your car. With the START VALUATION button you can begin a new valuation in one step. With an account you also see the value change of your saved cars.

Menu

Valuation, Garage, Recall info, Check, Car news, Useful tools, My account, Settings and Log out. Log out is visible only when you are signed in.

- **Valuation:** here you prepare the valuation (see below).
- **Garage:** the place of your saved cars, with the advertisement text (see below).
- **Recall info:** based on official data, it shows whether a manufacturer recall might affect your car. The result indicates that the car might be affected. The exact involvement must be checked based on the VIN.
- **Check:** checking the CarVinsight valuation ID.
- **Car news:** articles of the carvinsight.eu blog inside the app.
- **Useful tools:** with an account you can open inside the app the "Honosítás kalkulátor" (import registration calculator), and our pages "Autó honosítás" (car registration in Hungary), "Eredetiségvizsgálat ára" (price of the originality inspection) and "Autóbehozatal országonként" (car import by country). These pages are in Hungarian. For guests the menu item is shown with a lock.
- **My account:** sign-in, registration, account deletion.
- **Settings:** the language of the app. You still enter the market of the valuation on the data sheet of the valuation.

Sign-in and account

An account is not needed for the valuation. Sign-in and Registration are separate. You can sign in with a sign-in link by e-mail, or with a password: either with the sign-in link received by e-mail, or with your password. The app opens the link. If this does not work, you can paste the link or code received in the e-mail. Registration is done with a confirmation link received by e-mail. With an account, saved valuations are also available on a new phone, and the Garage, the value change of saved cars, Recall info, the Advertisement text and Useful tools open up.

You can delete your account and data in the app and also on the web: carvinsight.eu/hu/fiok-torles (Hungarian page). In the app, after your request we send a link by e-mail, with which you delete the account permanently. The link is valid for 24 hours.

Valuation process

Entering data: you choose the market and, separately, the language. You enter the make, model, model year, mileage, fuel, transmission, power and body style. The colour and equipment can also be recorded. Entering the condition, service history and damages is not mandatory.

Free preliminary result: it shows whether a valuation can be prepared. If there are too few similar cars, if the car is worth more than 50 000 euros, or if we do not issue the valuation, we stop before payment.

Identification: you enter a registration number or a 17 character VIN. There is also a path for a foreign registration number and one without an identifier. If the e-mail address looks mistyped, we suggest a correction.

Fee: the fee of the valuation is one-off, without a subscription. It is the fee shown in the store, currently 5 EUR. The app shows the fee before payment. You accept the terms and the declaration on immediate performance in the app.

PDF: the app downloads it, opens it even without the internet, and it can be shared and deleted. The document is valid for 30 days. You can scan the QR code of the PDF, or type in the CarVinsight valuation ID, and so verify the valuation. You can request the earlier PDF again within 30 days. A completed valuation can be modified once.

Garage

One car can be saved for free. Each additional car place is a monthly fee, currently 1 EUR per month per car. Each place is a separate monthly subscription that you can cancel separately at any time in the store. The valuation is valid for 30 days. After that, for a car in the garage you can request a new valuation with the saved data at the push of a button. The new PDF takes the place of the earlier one.

Advertisement text: In the Garage, for a saved car you can request an advertisement text from the data of the saved car, and you can also enter the equipment, the condition, the number of owners and the service history. You can send the text on with the Share button. Please check it before sharing.

Languages

The app is available in six languages: Hungarian, English, German, French, Dutch and Italian. In Settings, the language of the app can be set separately from the market of the valuation.

Details about the service: PriceOfMyAuto: valuation for private individuals.

Contact

You can find our contact details on the Customer service and contact page.

Packages and permissions: quick matrix

Feature	Bronze	Silver	Gold	Partners
Search and calculator	✓	✓	✓	no
Saved vehicles	✓	✓	✓	no
Valuation	Occasional	✓	✓	no
PDF and printing	✓*	✓	✓	no
Search from a sentence, pattern search, market window, results by listing portal	✓	✓	✓	no
Sales chance per vehicle (Recommendation, not mandatory)	✓	✓	✓	no

Using the marketplace (utilization)	✓	✓	✓	no
Entering the marketplace (supply)	no	no	no	✓

* At the valuation result, if the valuation has run.

The features previously only available in the test phase have been live for all dealers since 2026-10-20.

Data protection and roles

- Dealer and service provider accounts are separated.
- The uploading of vehicle registration certificates and personal documents is exclusively for business purposes, required for vehicle identification.
- CarVinsight does not store card details.

How CarVinsight works, a human-friendly explanation

CarVinsight is not a "desktop program" but an online service. You do not need to install anything for the web interface: it can be used from a browser from anywhere. On Android, two of our applications are also available in the Play Store, CarVinsight for dealers and PriceOfMyAuto (Autóérték in Hungary) for private individuals. Overview: Services and apps.

Concept	What it means in practice
Always available	You do not need to install or maintain anything, the service can be used from a browser. On Android, also from an application.
Remains fast	It remains usable even with multiple simultaneous users and higher traffic, and you do not need to do anything for this. For popular models or detailed data sheets, a few seconds of patience may be required.
Secure login and payment	Protected login, secure card payment. Bank transfer can also be chosen (monthly or annual fee).
Your data is safe	The company, the car stock, the valuations and the settings are stored securely, linked to the user.
Automatic updates	For example, the nightly revaluation of the stock and the notifications run even when you are not working in the system.
Method based on market data	The values, chances and recommendations are created using a method based on market data. Every recommendation is advisory in nature: "Recommendation, not mandatory".
Knowledge base	wiki.carvinsight.eu is the home of the user guides.

The dealer and the service provider use the same service, but with separate roles and on separate interfaces.

Live status (2026-11-15)

- All features for every dealer: search initiated from a sentence, interpretation of the result, sample search, Hungarian market analysis window, stock alert.
- Higher contrast free text search field and interfaces.

- Sales chance per car, with an understandable explanation. Always: "Recommendation, not mandatory". Nightly update at 04:05 (Budapest time) for all active dealers.
- Factory recall warning for everyone, with bulk stock checking and badges. A match of brand, model and year means that the car might be affected, the exact car must be checked based on the VIN.
- Results grouped and sorted by listing portal.
- Hungarian market data for September 2026: average price 5 460 000 Ft, 124 550 listings.
- Import calculator: the registration tax, the technical inspection fee and the official fees are calculated according to the current legislation, the calculation can be downloaded in PDF format under Saved vehicles.
- Unified brand and model list, Hungarian equipment names, seat number filtering.
- PriceOfMyAuto (for private individuals): one time, 1 490 Ft valuation in PDF, with a price range, email typo monitoring, resending the receipt to a corrected address, protection of the dealer stock based on the VIN.
- Public import calculator and national guides on the website.
- CarVinsight application for Android (for dealers): search, valuation and trade-in, saved cars, stock management, dealer registration with a 14-day trial. Available in the Play Store.
- PriceOfMyAuto application for Android (for private individuals), version 1.1.0: paid valuation, the PDF opens even without the internet and can be shared as an attachment, garage (one car for free, every further car is 1 EUR per month), new valuation after 30 days with the push of a button, checking recalls, listing text. Available in the Play Store.

Customer service and contact

Availability

Public contact: Telegram, https://t.me/CarVinsight

The CarVinsight philosophy

We do not have 'best' or 'good' customers, absolutely everyone is equally important. This is why all our dealer and service provider partners have direct access to the CarVinsight LLC team on the corporate Telegram channel, not just to a general customer service queue. And wiki.carvinsight.eu is the public knowledge base.

Live platforms

Platform	For whom	Address
Dealer application	Subscribed dealers	app.carvinsight.eu
Service provider application	Transporters, mechanics, car detailing, technical inspection, etc.	partners.carvinsight.eu
CarVinsight application for Android	Used car dealers	Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.dealer
PriceOfMyAuto (Autóérték in Hungary) web valuation	Private individuals	www.carvinsight.eu/en/car-valuation/
PriceOfMyAuto application for Android	Private individuals	Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.priceofmyauto
Knowledge base	Everyone	wiki.carvinsight.eu

Detailed description of the services and apps: Services and apps.

Official email domains

CarVinsight clients (dealers and service providers) can only receive emails from the following domains:

- carvinsight.eu
- talk.carvinsight.eu
- carvinsight.com

If an email arrives from another domain using the CarVinsight name, please do not consider it official. In such cases, please notify customer service.

Marketing emails typically arrive from the talk.carvinsight.eu domain. Administrative emails come from the carvinsight.com or the talk.carvinsight.eu domain.

PriceOfMyAuto: valuation for private individuals

This page describes the service as it is offered in Hungary. Service prices are shown in Hungarian forints (Ft), the app price is shown in euros.

PriceOfMyAuto (Autóérték in Hungary), valuation for private individuals

Web interface: www.carvinsight.eu/en/car-valuation/. One-time service without an account or login: the private individual enters their car details, pays, and receives a PDF valuation with the Hungarian market price range.

Feature	Status	In short
Entering VIN and number plate	Live	17-character VIN and Hungarian number plate (old and 2022 formats, custom number plates as well). Foreign number plates can also be entered, we only check this, we do not store it.
Free check: dealer stock	Live	If the car is in the stock of a CarVinsight dealer, we do not provide a valuation, and we do not ask for payment. The user receives a neutral message to contact the seller regarding the car. We never name the dealer.
Same VIN within 30 days	Live	No new valuation is created: if the same e-mail address paid for it, we resend the original PDF free of charge. The response is always neutral, we do not reveal anyone else's data.

Feature	Status	In short
Quick preliminary check	Live	After the car data (brand, model, year, km, fuel, transmission, condition, region, etc.), the system checks if there is enough market data. It does not show a price at this point. If there is not enough data, or the car is more expensive than 50 000 EUR, there is no payment button.
Payment: 1 490 Ft	Live	One-time fee, by bank card. Two separate checkboxes: Terms and Conditions and data processing, and the request for immediate fulfillment (acknowledging the loss of the 14-day right of withdrawal). Maximum 3 VINs per month per card and per e-mail address.
Colour PDF with price range	Live	Price range (lower and upper value), the market value of the car marked on the range ("Your car"), market picture, the 10 most popular models of the brand, factory recall signal if it might be affected, unique serial number and QR code. Alongside it is a payment receipt PDF. The download link is also sent by e-mail. The authenticity of the PDF can be verified on the /en/verify/ page.
Refund in case of faulty fulfillment	Live	If it turns out after payment that a valuation cannot be provided (for example, insufficient data, car in stock, error), we automatically refund the fee, and we notify you by e-mail.
Cars older than 20 years	Live	A valuation is also created for cars older than 20 years, with a broader market comparison and a two-page PDF.
Accent-independent brand and model matching	Live	For example, "Škoda" and "Skoda" count as the same, so the valuation is not omitted even with accented input.
Unified brand and model list, cascading drop-down lists	Live	On the web form, you can choose in the order of brand, model, year. If the list is not available, it remains a free text field.
E-mail typo monitor	Live (2026-10-20)	The form provides a suggestion for a probable typo: "Did you mean: ...?"

Feature	Status	In short
Resending receipt to corrected address	Live (2026-10-20)	In case of an incorrect address, after customer service correction, the receipt and the download link are sent to the correct address.
Mobile application	Active (Android, version 1.2.0, 2026-11-20)	Separate app (PriceOfMyAuto). The one-off valuation fee is the fee shown in the store, currently 5 EUR. You pay after the free preliminary result, the PDF can be opened in the app, downloaded, shared and is available even without the internet. The home screen shows the aggregated trend of the Hungarian used-car market, also for guests. With an account: Garage (one car for free, each further car place is a separate monthly subscription, currently 1 EUR per month, no package), value change of saved cars, a new valuation from the Garage after 30 days at the push of a button, Recall info, Advertisement text, Useful tools. Car news, checking the valuation ID, six languages (Hungarian, English, German, French, Dutch, Italian). Details: Services and apps. Available on Android in the Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.priceofmyauto

Status (2026-10-28)

The service is live, its price is a 1 490 Ft one-time fee. The adjustment of VAT handling to the rules of EU sales to private individuals was announced on 2026-10-27, the price and the ordering process have not changed.

Data processing in short

We only store the number plate in a protected format. Unpaid checks are deleted after 24 hours. We keep the e-mail address together with the order for 90 days, separated from the car data. We do not store card data. Details: Privacy Notice.

PriceOfMyAuto: car valuation for private individuals (price, order)

This page describes the service as it is offered in Hungary. Web service prices are shown in Hungarian forints (Ft), app prices are shown in euros.

PriceOfMyAuto (Autóérték in Hungary): how much is your car worth?

PriceOfMyAuto is the CarVinsight service for private individuals. If you want to sell your car, we show you how much it is worth on the market right now. You receive the result immediately in a PDF. You can request a valuation not only for your own car: if you have your eye on a car you want to buy, you can also find out its value based on market data.

What do you get?

- The market value of the car with a price range (lower and upper value) based on the current listing prices of similar cars.
- Practical tips tailored to your car for advertising and bargaining.
- A unique verification code with which the buyer can check that the PDF is genuine.
- A payment receipt. We also send the download link by e-mail.

How much does it cost?

1 490 Ft, a one-off fee. For web orders, there is no subscription, no recurring charge, and you do not need to register.

In the PriceOfMyAuto app (Android), the valuation is also a 5 EUR one-off fee. One car can be saved for free in the garage. Each further car place is an optional monthly subscription, at 1 EUR per month per car. After 30 days, you can request a new valuation from the garage with the push of a button for 5 EUR. Details: Services and apps.

How can you order it?

1. Open the www.carvinsight.eu/en/car-valuation page.
2. Enter the VIN, number plate and main details of the car (brand, model, year, mileage, condition).
3. A free, quick check shows which car we have identified and whether there is enough market data for a reliable valuation.
4. If so, pay by bank card on the secure payment page.
5. The PDF is generated immediately, and you also receive it by e-mail.

If it turns out after payment that we cannot provide a valuation, we automatically refund the fee.

Mistyped e-mail address

- The order form warns you if the e-mail address is likely a typo and offers a correction: "Did you mean: ...?"
- If the order still went through with an incorrect address, write to us: after correcting the address, we will resend the receipt and the download link to the correct address.

When can you not get a valuation?

- If the car is in the registered stock of a dealer using CarVinsight. We check this based on the VIN before payment, so you do not even have to pay in this case. The stock of dealers is protected this way.
- If there is not enough market data about similar cars.
- If the car is worth more than 50 000 euros.

Status (2026-10-28)

PriceOfMyAuto is a live service: 1 490 Ft one-off fee, by bank card, without registration. We are adjusting the VAT handling to the rules applicable to EU buyers for services provided to private individuals, the notification was submitted on 2026-10-27. This does not mean a change in the price or the order process for buyers.

Do you have a question?

Write to us, we are happy to help. You can find our contact details on the *Customer service and contact* page.

Changelog

This page records by date which features have gone live. We only list live features.

20 November 2026

- **PriceOfMyAuto app for Android, version 1.2.0:** renewed home screen with the aggregated trend of the Hungarian used-car market (also for guests) and the value change of saved cars. New menu: Valuation, Garage, Recall info, Check, Car news, Useful tools, My account, Settings. Useful tools with an account: the import registration calculator and three information pages. Sign-in with a sign-in link by e-mail or with a password, separate Registration. Advertisement text in the Garage, with sharing. The app language can be set separately, in six languages.
- **Wiki:** updated page Services and apps.

15 November 2026

- **PriceOfMyAuto app for Android, version 1.1.0:** the PDF can be opened from the result button and the saved list, downloaded and shared as an attachment, and is available even without the internet. Garage: one car for free, every further car place is 1 EUR per month, without a package. The valuation is valid for 30 days, after which a new valuation can be requested from the garage with the push of a button for 5 EUR, and the new PDF takes the place of the old one. Checking recalls and the advertisement text is available with an account, the login is kept for 90 days.
- **Wiki:** new page with an overview of the services and the two Android apps: Services and apps.
- **Wiki:** consistent wording on the Hungarian pages and in their titles, and the "Under development" sections describing a feature that is not live have been removed.

14 November 2026

- **CarVinsight app for Android (for dealers):** dealer registration in the app with a 14-day trial period, left menu, market signal and recall warning, stock page per car, calculation and valuation PDF, account deletion in the app.

13 November 2026

- **Recall explanation for all dealers:** the recall explanation of the CV agent now appears for every logged-in dealer in the Search, during Valuation and in the stock, in the language selected on the interface (Hungarian, German, English, Dutch, Italian, French). The text undergoes a linguistic check before it appears. The specific vehicle must still be checked based on the VIN.
- **European car news daily:** CarVinsight updates the collection of European car news daily. The CV agent also relies on these news items stored in our own database when providing information about recalls and the market situation.
- **Market signals from the CV agent in the Search, during Valuation and in the stock:** the CV agent provides factual signals supported by numbers from our own market database. These include the annual change in the advertised supply and asking price of the brand, the typical time spent on the market and the disappearance rate (sale or withdrawal) of the given model, the evolution of the supply, and where the mileage and asking price of the vehicle are positioned among similar advertisements.
- **Only well-founded signals:** a signal only appears if at least 20 comparable advertisements are available and the change is significant. If there is not enough data for this, the CV agent does not state anything. Example: "According to our market data, the advertised stock of this brand increased by 33.5% in one year between October 2025 and October 2026 (3760 → 5020 advertisements)." Example at the model level: "According to our market observations, advertisements similar to this model typically disappear from the market in 24 days (sale or withdrawal), which corresponds to a disappearance rate of 45.7% (based on 81 advertisements)."
- **Prices do not change:** the market signals exclusively provide an explanation. The result of the Valuation, the price position and the calculation of the Sales chance remain unchanged.
- **Expanding range of models:** daily market monitoring has been extended to additional popular models. The signals appear for each model once sufficient data has been collected. The time on the market becomes available in the first weeks of data collection, while the 30-day change in supply and the 90-day change in asking price become available 60 and 90 days after the start of data collection, respectively.

11 November 2026

- **Recall warning for everyone in three places:** in the Search (badge in the list, detailed warning on the data sheet), at the result of the Valuation and in the stock. The warning only indicates that the model might be affected; the specific vehicle must be checked based on the VIN.
- **CV agent explanation in the Search, during Valuation and in the stock:** the CV agent explains what the recall is about in the language of the dealer, exclusively based on

official data and European car news stored in CarVinsight's own database.
- **Language:** the warning also appears in Hungarian, German, English, Dutch, Italian and French, according to the language selected on the interface.

2026-11-09

- **Batched search:** if the first page of search results arrives more slowly, the system does not show an empty list, but indicates that the search is still in progress, and then displays the results.
- **Search strategy:** the local check of the transmission and fuel is more patient; the filters adapt better to the values typical for the model.
- **New model system:** the brand and model lists are built on the models actually observed in stock (in advertisements), so there are fewer empty or misleading choices.
- **Vehicle identification:** model recognition and the year check are available to every dealer; in uncertain cases, it asks for confirmation.
- **Customer offer (only for dealers in Hungary):** a "Used vehicle import procurement offer" PDF valid for 24 hours can be issued to the buyer from a saved vehicle. The document contains the purchase price and the informative official fees.
- **Hungarian market window** and the **free text search** remain available to every dealer (see the Search and Where the decision picture comes from pages).

2026-10-28

- **Faster search:** the first page of search results typically appears within 3 seconds, usually between 1 and 2 seconds. For popular models, a few seconds of patience might be needed.
- **Instantly opening data sheet:** the data sheet of the advertisement opens instantly with the data and photos known from the search, in at most 4 or 5 seconds. The full description loads in the background later.
- **Honest data sheet status:** if the description has not arrived yet, the data sheet indicates this, it does not show an incomplete data sheet as ready, and the photos do not disappear.
- **More stable search for popular models:** searching for models with a high number of advertisements is more reliable.

2026-10-27

- **Damaged cars excluded by default:** the search does not show damaged or crashed advertisements by default, but they can be displayed upon specific request.
- **Default filters per model:** if there are enough advertisements, the transmission type and bodywork typical for the model appear as pre-selected recommendations.
- **PriceOfMyAuto (Autóérték in Hungary), VAT handling:** the declaration of VAT handling concerning EU private individual buyers was submitted on 2026-10-27. The price for buyers does not change, it remains 1 490 Ft.

2026-10-20

- **Every feature for every dealer:** the features previously only available in the test circle are available to every dealer.
- **More contrasting search field:** the free text search field and its interfaces are more readable.
- **Sales chance per vehicle:** with our own method built on market data, with an understandable explanation. Always: Recommendation, not mandatory. The nightly update refreshes the stock of every active dealer at 04:05 (Budapest time).
- **Factory recall warning for everyone:** bulk check for the stock, badges at the affected cars.
- **Results by listing portal:** the search results appear grouped and sorted by listing portal.
- **Hungarian market data for September 2026:** average advertised price 5 460 000 Ft, 124 550 advertisements.
- **PriceOfMyAuto (for private individuals):** e-mail typo monitor ("Did you mean: ...?") and receipt resending to a corrected address.
- **Dealer protection:** a private individual cannot order a PriceOfMyAuto valuation for cars included in the stock of a registered dealer (based on the VIN).
