For dealers

Dealer web interface (app.carvinsight.eu)

The complete interface of the dealer service. It can be used from a browser from anywhere without installation. Registration, package selection, payment and billing also take place here.

- **Search:** you can search the European supply with filters or free text, even based on a photo. Data sheet with the photos and data of the advertisement, import calculator with the registration tax, the technical fee and the official fees.
- **Saved vehicles:** a temporary parking space for offers not yet in stock. For dealers in Hungary, a customer offer PDF can also be issued.

- **Valuation:** Quick valuation, Stock valuation (Gold), Trade-in, opening a previous valuation by code, printing and PDF.
- **Stock management (Gold):** stock list, adding a car, uploading the vehicle registration certificate, pricing and nightly price monitoring, sale and removal, stock import.
- **Market signals and warnings:** the market signals of the CV agent, Sales chance per car ("Recommendation, not mandatory") and factory recall warning in the Search, in the Valuation and in the stock.
- **Settings:** site, own cost reserves, marketplace service providers, official fees, nightly threshold, stock import.
- **Profile and support:** account details, subscription (Bronze, Silver, Gold), billing address, as well as creating and tracking a Support request.

New dealers get a 14-day trial without a bank card. Details: Registration and activation, Packages: Bronze, Silver, Gold, Overview of menu items.

CarVinsight app for Android

The purchasing, valuation and inventory app for used-car dealers. Available in the Play Store: https://play.google.com/store/apps/details?id=eu.carvinsight.dealer

- **Search:** you can search the monitored European supply with filters or free text. You can also identify the car from a photograph and start a search from a photo of the vehicle registration certificate or the technical data sheet, or from their PDF or image file. Both dealer and private individual advertisements can be displayed among the results.
- **Advertisement details:** photos and main data, the cost calculation of the import based on the saved settings. If data is available, a market signal, sales chance and recall warning are also visible.
- **Valuation and Trade-in:** market valuation, recording the Trade-in and the dealer margin, retrieving previous valuations with a code. A PDF can be created and shared of the calculation and the Valuation.
- **Saved vehicles:** saving the selected advertisements, monitoring whether they are still available and contacting the seller.
- **Stock management:** active stock, pricing warnings and drafts to be completed. A stock draft can be started from an advertisement or based on the VIN. Price history, photo upload, recording the sale or archiving per car. There is no bulk stock upload in the app, this is available on the web interface.
- **Settings and notifications:** recording costs and delivery method, phone notification, requesting the deletion of the account.

You can log in with your existing CarVinsight account, or you can also register as a dealer in the app with a 14-day trial period. If your account has a service provider role, the service provider interface opens with the same login. Billing and package management take place on the web interface, there are no purchases in the app.

For service providers

Service provider interface (partners.carvinsight.eu)

For businesses offering transport, service, cosmetics, technical inspection or other services that would like to appear on the CarVinsight marketplace. The service provider role does not include a dealer subscription.

- Dashboard with the status of the Profile and the verification.
- Orders, Services, Opening hours and Calendar (if available in the account), Settings and Support.
- Dealers see nearby service providers based on their site, and they can also calculate with your services in the calculator.

Details: Who is the marketplace for?, Login and the Dashboard.

For private individuals: PriceOfMyAuto

Valuation built on market data in PDF format for your own car or a selected car. The valuation is for informational purposes: it is not an official expert opinion, not an on-site condition assessment and not a purchase offer.

Web valuation

www.carvinsight.eu/en/car-valuation/: 1 490 Ft one-off fee, with a bank card, without registration.

Details: PriceOfMyAuto: car valuation for private individuals (price, order).

PriceOfMyAuto app for Android (version 1.2.0)

PriceOfMyAuto (Autóérték in Hungary) is an app for private individuals. It prepares a valuation built on market data, in PDF format, for your own car or a selected car. The valuation is for informational purposes: it is not an official expert opinion, not an on-site condition assessment and not a purchase offer.

Available in the Play Store:
https://play.google.com/store/apps/details?id=eu.carvinsight.priceofmyauto

Home screen

On the home screen you see the aggregated trend of the Hungarian used-car market, also as a guest. Your saved cars appear below it. In the Market change section we show the movement of the model market of your saved cars, if data is available. This is not a new valuation and not the official value of your car. With the START VALUATION button you can begin a new valuation in one step. With an account you also see the value change of your saved cars.

Menu

Valuation, Garage, Recall info, Check, Car news, Useful tools, My account, Settings and Log out. Log out is visible only when you are signed in.

- **Valuation:** here you prepare the valuation (see below).
- **Garage:** the place of your saved cars, with the advertisement text (see below).
- **Recall info:** based on official data, it shows whether a manufacturer recall might affect your car. The result indicates that the car might be affected. The exact involvement must be checked based on the VIN.
- **Check:** checking the CarVinsight valuation ID.
- **Car news:** articles of the carvinsight.eu blog inside the app.
- **Useful tools:** with an account you can open inside the app the "Honosítás kalkulátor" (import registration calculator), and our pages "Autó honosítás" (car registration in Hungary), "Eredetiségvizsgálat ára" (price of the originality inspection) and "Autóbehozatal országonként" (car import by country). These pages are in Hungarian. For guests the menu item is shown with a lock.
- **My account:** sign-in, registration, account deletion.
- **Settings:** the language of the app. You still enter the market of the valuation on the data sheet of the valuation.

Sign-in and account

An account is not needed for the valuation. Sign-in and Registration are separate. You can sign in with a sign-in link by e-mail, or with a password: either with the sign-in link received by e-mail, or with your password. The app opens the link. If this does not work, you can paste the link or code received in the e-mail. Registration is done with a confirmation link received by e-mail. With an account, saved valuations are also available on a new phone, and the Garage, the value change of saved cars, Recall info, the Advertisement text and Useful tools open up.

You can delete your account and data in the app and also on the web: carvinsight.eu/hu/fiok-torles (Hungarian page). In the app, after your request we send a link by e-mail, with which you delete the account permanently. The link is valid for 24 hours.

Valuation process

Entering data: you choose the market and, separately, the language. You enter the make, model, model year, mileage, fuel, transmission, power and body style. The colour and equipment can also be recorded. Entering the condition, service history and damages is not mandatory.

Free preliminary result: it shows whether a valuation can be prepared. If there are too few similar cars, if the car is worth more than 50 000 euros, or if we do not issue the valuation, we stop before payment.

Identification: you enter a registration number or a 17 character VIN. There is also a path for a foreign registration number and one without an identifier. If the e-mail address looks mistyped, we suggest a correction.

Fee: the fee of the valuation is one-off, without a subscription. It is the fee shown in the store, currently 5 EUR. The app shows the fee before payment. You accept the terms and the declaration on immediate performance in the app.

PDF: the app downloads it, opens it even without the internet, and it can be shared and deleted. The document is valid for 30 days. You can scan the QR code of the PDF, or type in the CarVinsight valuation ID, and so verify the valuation. You can request the earlier PDF again within 30 days. A completed valuation can be modified once.

Garage

One car can be saved for free. Each additional car place is a monthly fee, currently 1 EUR per month per car. Each place is a separate monthly subscription that you can cancel separately at any time in the store. The valuation is valid for 30 days. After that, for a car in the garage you can request a new valuation with the saved data at the push of a button. The new PDF takes the place of the earlier one.

Advertisement text: In the Garage, for a saved car you can request an advertisement text from the data of the saved car, and you can also enter the equipment, the condition, the number of owners and the service history. You can send the text on with the Share button. Please check it before sharing.

Languages

The app is available in six languages: Hungarian, English, German, French, Dutch and Italian. In Settings, the language of the app can be set separately from the market of the valuation.

Details about the service: PriceOfMyAuto: valuation for private individuals.

Contact

You can find our contact details on the Customer service and contact page.
